ELTE TTK
Faculty of Science - ELTE Eötvös Loránd University

In the service of science

FACULTY OF SCIENCE
ELTE is the oldest university in Hungary. Teaching of sciences at the University started in the year of foundation, in 1635. In the first years, mathematics and physics were taught in the Faculty of Art, while teaching chemistry, biology and earth sciences started in the second half of the 18th century.

The Faculty employs 463 lecturers and researchers. Several of our professors received prestigious international and Hungarian awards like the Wolf Prize, Steklov Prize or Albert Szent-Györgyi Prize. Our fields of education cover the full spectrum of sciences. The seven main fields belong to five institutes and two education departments supervised by the Dean. All five institutes participate in our environmental education training.

The Faculty of Science at the ELTE Eötvös Loránd University is the largest institution in Hungary where all branches of sciences are represented at the highest level. The intellectual capital accumulated here is a unique opportunity for our students to expand their knowledge and exploit their individual resources, hereby meeting the requirements of a knowledge-intensive information society.

4173 students
400 PhD students
49 university professors
25 members of the Hungarian Academy of Sciences
59 Doctors Honoris Causa
46 emeritus professors
59 in the Faculty of Science - ELTE Eötvös Loránd University
